

WASTE ENERGY RECOVERY CONDENSERS :

Features :

1. Use of waste steam for heating
2. The condenser of the waste heat supplier equipment is sufficient for cooling.

Primary field of use:

1. outgoing vapour of drying equipments szárító berendezések kimenő párája / protein processing plants /
2. shoot steam recovery

Technical parameters:

Performance	:	500- 3.000 l/hour evaporation
Degree of condensation	:	25 - 35 % of the original volume
Electricity demand	:	70-300 lit/kW
Number of stages	:	1
